Job Portal API Documentation

Project Overview

The Job Portal API is a backend service built with Node.js, Express, and MongoDB. It facilitates connections between job seekers, employers, and recruiters.

Base URL: “http://localhost:8080/api”

Authentication & Authorization
All protected endpoints require a Bearer Token to be sent in the request header.

Authorization: Bearer <your_jwt_token>

Roles
- Seeker: Can browse jobs, upload resumes, and submit applications.
- Employer: Can create a company profile, post jobs, and review applications.
- Recruiter: Can post jobs on behalf of employers.
- Admin: Has unrestricted access to all resources.

1. Authentication Endpoints

Register User
Register a new user to receive an access token.
Base URL: ‘/auth/register’
Method: ‘POST’
Auth Required: No
Request Body (JSON):
```
json
{
  "name": "John Doe",
  "email": "john@mail.com",
  "password": "password123",
  "role": "seeker" // or "employer"
}
```

Success Response: ‘201 Created’
```
json
{ "success": true, "token": "eyJhbGciOiJIUzI1NiIsInR..." }
```

Login User
Base URL: ‘/auth/login’
Method: ‘POST’
Auth Required: No
Request Body (JSON):
```
json
{
  "email": "john@mail.com",
  "password": "password123"
}
```

Success Response: ‘200 OK’
```
json
{ "success": true, "token": "eyJhbGciOiJIUzI1NiIsInR..." }
```

2. Company Endpoints

Create a Company
Base URL: ‘/companies’
Method: ‘POST’
Auth Required: Yes (Employer, Admin)
Request Body (JSON):
json
```
{
  "name": "97 Tech Hub",
  "description": "software Development company.",
  "website": "https://97tech.com",
  "location": "Abuja, Nigeria"
}
```
Success Response: `201 Created`

Get All Companies
Base URL: ‘/companies’
Method: ‘GET’
Auth Required: No
Success Response: ‘200 OK’ (Array of companies)

3. Job Endpoints

Post a Job
Base URL: ‘/jobs’
Method: ‘POST’
Auth Required: Yes (Employer, Recruiter, Admin)
Request Body (JSON):
json
```
{
  "title": "Senior Backend Developer",
  "description": "Build scalable APIs.",
  "requirements": ["Node.js", "MongoDB"],
  "salaryRange": "$120k - $150k",
  "location": "Remote",
  "company": "<company_id>"
}
```

Success Response: ‘201 Created’

Get All Jobs
Base URL: ‘/jobs’
Method: ‘GET’
Auth Required: No
Success Response: ‘200 OK’ (Array of jobs)

4. Resume Endpoints

Upload Resume
Base URL: '/resumes'
Method: 'POST'
Auth Required: Yes (Seeker)
Request Body (Multipart Form-Data):
Key: 'file' (Type: File)
Success Response: '201 Created'

5. Application Endpoints

Apply for a Job
Base URL: '/applications'
Method: 'POST'
Auth Required: Yes (Seeker)
Request Body (JSON):

```
json
{
  "job": "<job_id>",
  "resume": "<resume_id>",
  "coverLetter": "I am excited to apply..."
}
```

Success Response: '201 Created'

View Applications

Base URL: '/applications'
Method: 'GET'
Auth Required: Yes
Behaviour:
If 'Seeker', returns the applications they submitted.
If 'Employer', returns applications submitted to their jobs.
Success Response: '200 OK'

Additional Endpoints Available

(Requires standard Bearer Token auth)

'/users': Admin management of all users on the platform.
'/interviews': Schedule and manage interviews for applicants.
'/saved-jobs': Allow seekers to bookmark jobs for later.
'/notifications': Real-time alerts for application status changes.
'/reports': Generate platform statistics and analytics.
